GENESIS
NETWORKS

Genesis Networks is a Singapore based IT Services company started since 2001. With support from our valued clients, we successfully delivered many private and public sectors projects; leveraging on in-house application development capabilities, systems integration expertise and a privately owned data centre facility, to offer one-stop services .

Our businesses can be summarised as:

- **Enterprise Software** – Enterprise Search & Business Analytics, IIoT, Fintech, Access Control
- **Infrastructure Project** – LAN, WAN, SAN, Wired, Wireless, Virtualisation, Migration
- **Managed Services** – Post Sales Support, Remote Monitoring, 24x7 Service Desk
- **Data Centre Services –** DR/BCP, Cloud Services (such as DRaaS, IaaS, SDN etc)
- **IT Security Audit and Compliance Services**

As a visionary company, Genesis navigated into new technology frontiers, incorporating **Big Data, Industrial IoT, Fintech, Data Analytics, Private/Hybrid Cloud Services, Cognitive Analytics and Mobile Apps** into our solution stacks.

We are not alone. We credit some of our successes to the strong support from key technology partners such as **DELL EMC, IBM, HPE/Aruba, Lenovo, Pure Storage, Cisco, F5, Microsoft, VMWare, Datto, Veeam, Commvault, Arcserve, Checkpoint, Fortinet, Palo Alto, Nutanix, Quest, Kaspersky and Trend Micro;** all of whom have helped Genesis raise our level of technical and sales expertise through training and sharing.

Genesis Networks – Integrating People, Process and Technology for Modern Businesses
